

Planning Future Merton
Merton Civic Centre
London Road
Morden
SM4 5DX

31 January 2021

Dear Sir or Madam

We are writing to object to the proposed new road which is listed as Proposal TN17 of Policy T6.9 that is part of Merton's Local Borough Plan Consultation 2a.

Enclosed is a list of several of the many objections we have to the proposal, which was prepared by the Carshalton Road, Aspen Gardens and Goat Road (CRAG) residents association.

As the owners and residents of , we want to emphasise that our property is not shown or considered in the proposals, despite pre-dating the proposal by several years. The impact to our property and family, which would be among the highest if the proposal proceeds, has not been considered or referenced in terms of safety and pollution, both air and noise. We have not been consulted any time during the process. These points alone we feel makes this proposal untenable.

In general, the residents most impacted by this proposal, chose to live here for several reasons, the secluded nature of the environs being removed from the main roads, the shielding provided by the environment from noise and air pollution and the flora and fauna, only some of which have been listed in the attached resident's association objection, that make up our local eco-system. A suburban haven in an otherwise urban part of London. This proposal would directly impact our lives and our continued desire to remain where we are.

Please cancel this proposal.

Yours faithfully
