

Moore .M

Dear Sir/Madam

Firstly let me introduce myself, my name is Margareta Moore and I live at xxxxxxxx with my husband and two young children.

As a family, we completely object to the idea of a road being built directly behind our garden. There are many issues with an access road being built such as; air pollution, noise pollution, fly tipping and safety.

With many heavy duty trucks passing by all day, every day, there would inevitably be air pollution as the fumes from these trucks would have a significant impact on the air quality, with the air quality potentially worsening our young children's health and putting their wellbeing at an unnecessary risk.

The volume of traffic would cause excessive noise pollution which will have a negative impact on our lives 24/7.

The amount of fly tipping is bound to increase (tenfold) due to the rise in traffic and pedestrians using the new road. Not only would this be unsightly for the residents of Aspen Gardens but again causes another health risk due to the guaranteed increase of vermin that would be enticed by the rubbish just behind our garden fence. This could lead to an infestation of mice, rats and other vermin.

The safety and wellbeing, not only of my children but of the many other children as their 'healthy' and 'safe' walk to school (as they are encouraged on a daily basis by their schools) would be massively disrupted and most certainly stopped, which would almost definitely result in less healthy children and more cars on the roads, which would exacerbate the air pollution even further.

Not only are there the obvious safety hazards but the noise and air pollution would stop residents from enjoying their outdoor space which is needed for physical and mental health.

Should we not enjoy our outdoor space just to accommodate another road leading to the industrial estate (which already has two access points!) ?

We implore you to take our concerns into consideration and not invade the (already limited) outdoor space that we all need.

Yours sincerely,
