Subject: Masterplan

Regarding the Masterplan for Wimbledon as proposed by the Council I feel it does not take into any consideration for local residents. Why turn it into a business location when there are already empty office space and more and more people are working from home rather than large office accommodation.

One of the good things about Wimbledon is its variety of food shops, why the need to reduce this number.

We do not need 18 storey buildings to spoil the current historic buildings left in the town and more open public spaces will just mean more areas for the homeless to set up and sleep.

The plan for a new concert hall, promised when Centre Court build does not get a very high profile in the plan which should be a priority.
