

Respondent ID	What do you think are the priorities for creating health places in Merton? Please identify the three most important items from the list below?	The quality of the public realm has a significant influence on quality of life. The way we feel our sense of place, security and belonging as well as having an influence on a range of health and social factors. How important do you think each of these factors are for creating "healthier" streets?	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?	Are there any measures you think we should use to reduce fear of crime?	Dementia is now recognised as a national priority, with the number of those affected growing all the time. Most people in the country will be touched by dementia either directly or indirectly at some point in their lives. Merton Council is committed to becoming a Dementia Friendly Borough. Planning has a role to play to ensure that our town centres, local areas, the design of buildings and spaces are dementia friendly such as the new Collins Woods Library and Merton's Dementia Hub. Merton both have incorporated dementia friendly good design principles through the layout and design both internally and externally. Do you agree that the Local Plan should promote dementia friendly design principles such as: - quiet areas as people to reduce the impact of hyper-sensitive to noise, access to safe outside spaces, good views from inside buildings	The new Local Plan policy will set out the types of planning application that require an Air Quality Assessment and what considerations and mitigation should be necessary. An Air Quality Assessment is an assessment of the impact of a development on the levels of certain pollutants in the local area. Which of these types of development should require an air quality assessment? Tick all that apply.	Section 106 Planning policy allows for Local Authorities to request developers to make a financial contribution to large developments to help the borough mitigate the impacts of air pollution. Do you think we should be requesting this contribution?	The construction phase of major development can result in emission of air pollutants that adversely affects human health as well as dust. To ensure that emissions are well controlled all planning consents for major development will include relevant planning conditions to reduce these impacts. Do you think there is anything else the council could consider to reduce the potential impacts of construction on air pollution?	Are you concerned about the number of A5 class use (hot food takeaways) in your local area?	Do you think we should consider limiting the increase of certain classes of use, such as A5 (hot food takeaways) around secondary schools?	To help us understand the facilities in your local area, please enter the first 4 or 5 digits of your postcode below (e.g. SM4 5 or SW19 8).			
	Air Quality Not too noisy Good public transport Green spaces Good cycling and walking routes, paths, bridleways Healthcare facilities like hospitals, GP surgeries, health centres and pharmacies School places and other educational provision Childcare and early years provision Inclusion and accessible environment for all People with disabilities and reduced mobility Green infrastructure and open spaces including parks Community facilities and spaces including libraries Sports, leisure and play facilities Emerging Services facilities for public, community and private services	Priority streets and shelter Routes to shops and rest Real skills Pavements and cycle paths that are not dirty Good connections Not too noisy Good lighting Good signage Thought to use and do, interesting and stimulating with attractive views, buildings, planting and street art	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?	Open-Ended Response	Yes/No/Don't know	Developments with potential to significantly change road traffic on busy roads Developments that introduce or increase car parking facilities by 100 spaces or more Major Developments (10 units or more) Developments which will be required to meet a minimum standard for air quality for a significant period of the year, particularly for developments located on roads with high traffic volumes or in generally congested areas Developments which will be required to meet a minimum standard for air quality for a significant period of the year, particularly for developments located on roads with high traffic volumes or in generally congested areas Developments involving biomass boilers, biomass or gas combined heat and power plants or large scale biomass gasification plants Schools or healthcare facilities Substantial earthworks or demolition Developments in Merton's Air Quality Focus Areas (please specify)	Yes/No What sites do you think this should apply to? Please use the box below to tell us.	Yes/No Please use the box below to tell us more (optional)	Yes/No/Don't know	Please use the box below to tell us more (optional)	Open-Ended Response			
661251493	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?	I like being kept in the loop by the neighborhood social media police presence	Yes	X	Wanted to tick all of these	Yes	No	Need to make sure that every one of site associated with the work has correct skills including drivers	Don't know	KT3 6		
661250866	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?	greenery and ease of access for all	Yes	X		Yes	Yes		Yes			
661079555	X	Very important	ALL THE ABOVE ARE EQUALLY IMPORTANT	ALL THE ABOVE ARE PROPER AIMS	Yes		SMALL SELF BUILD SITES SHOULD BE EXCLUDED FROM SECTION 106 REQUIREMENTS OR REQUIREMENTS SHOULD BE RELAXED TO AVOID DETERRING OWNERS FROM DEVELOPING.	Yes	No		Yes	SW19 3		
6610093265	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?	Implementing functional green infrastructure to help mitigate for the impacts of surface water runoff, urban heating, air and noise pollution, as well as providing habitat for biodiversity. This is more than just 'things to see and do'.	Not within our remit	Yes	https://www.gov.uk/government/news/new-research-into-dementia-and-the-role-of-the-natural-environment	Yes	No	Developments with potential to support an increase in or maintain vehicular traffic (eg parking, vehicular movements) and/or other air pollution sources.	We presume planning conditions take account of location, timing, methodologies, and appropriate enforcement and penalties if not met.	outside our remit	outside our remit	
660834065	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?	Local and community policing. More local and community spaces, clubs. More local shops and high streets (not just chain high streets, or superstore supermarkets). Good public transport and parking. Building communities that are inclusive of all is key to residents and visitors feeling happy and safe.	Yes			Yes	No					
6601025616	X	Very important	Extension of the city bike scheme	Improve lighting on lake road	Yes	X		Yes	No		Yes	SW19		
6598054251	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?	stop the closure of the local police station	Yes	X	the survey doesn't work properly on this page, it only lets you tick one of the above boxes, I wanted to tick them all	Yes	Yes	monitor all such developments more carefully and impose hefty fines on developers who pollute		just find ways to encourage more healthy food outlets, eg charge more in rates for outlets that are generally considered to be serving unhealthy food	SW19 5	
6597514135	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?		No	X	this part of the survey is not working it only allows you to select one option	Yes	No		No	No	sw19 3	
6595052002	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?		Yes	X		Yes	No		Yes	Yes	SM4 6	
6591460678	X	Very important	encouraging employers to adopt policies and practices that support the health of their staff	giving priority to pedestrians, cyclists and public transport. Introducing a borough-wide 20mph limit that is well publicised and enforced. Limit of motor vehicles should definitely be - and feel - bottom of the list. Making driving less convenient is a necessary 'nudge'.	Yes	And lots of training/education	X	I want to tick all boxes but the questionnaire won't let me. Every development has a potential negative impact on air quality therefore all should be assessed. Negative impact should not be enough: the aim should be for all developments to make a positive contribution to air quality. Assessments should be independent and not prepared by developers. They should be thoroughly and robustly assessed to ensure accuracy and realism.	Yes	It should definitely apply to developments likely to cause a negative impact on air quality. It should apply to every development to help lead to improvement of the existing situation too. Air quality neutral is not sufficient: everything should have a positive effect.	How do workers travel to and from the site? what do they eat? How do they dispose of their waste?	Yes	definitely, boys at Rutish have been known to be served chips for breakfast at Waffle Jacks.	SW19
6590510557	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?	encouraging employers to adopt policies and practices that support the health of their staff	Yes	And lots of training/education	X	only one at a time is tickable	Yes	vehicles involved in the construction	Don't know	Yes	sw19 4	
6583333029	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?		Yes	X	FY - This question does not permit more than one answer to be ticked, and you state 'tick all that apply'	Yes	Yes		Yes	All schools, and everywhere		
6581172676	X	Very important	Discouraging the school run, discouraging the use of cars for local short journeys.	Join up different pieces of evidence about pesticides which could lead to more prosecutions	Yes	Green space and better air quality would help. It is becoming clear that pesticides can contribute to dementia. Stop spraying public areas with pesticides, especially stop killing wasps which are important pollinators	X	All these apply but the tick will only operate one box at once	Yes	New homes should not have car parking spaces and planning permission should not be given for further concreting of front gardens.	Yes	Say no to the concrete batching plant	Don't know	SW19 7
6565246625	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?	Fewer cars and more green space	Yes			Yes	No		Yes			
656414508	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?	Wide pavements, clear of clutter. Bike racks away from quiet spaces. Active neighbourhood watch groups. Designated 'safe spaces' - i.e. local businesses who are identified as places of sanctuary from where the police can be called.	Yes	X		Yes	No		Yes	Yes	SW19 3	
656161941	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?		Yes	X	All should require an air quality assessment - the tick-box function doesn't work.	Yes	Yes	Smaller developments on residential streets often cause excess dust and pollution, which can have a huge impact on neighbours. Tasks such as cutting paving slabs and bricks and partial demolition should be properly monitored.	Yes	Or provide better litter bins and recycling facilities by these premises.	SW20 0	
6553198540	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?		Yes	X		Yes	No		Yes	Yes	SM5	
6552426143	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?		Don't know	X		Yes	Yes		Yes	The quality of those places that is the main concern.	No	SM4 6
6550090812	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?		Yes	X		No	Yes		Yes	Yes	SW19 8	
6549055473	X	Very important	This is a very silly question. I wish to protest most strongly that these vital issues are all combined in one superficial question. For example, we need much better protection for the hierarchy of Sites of Importance for Nature Conservation, but the site-based questions insist that each site be identified individually: the sites were identified 20 years ago and most are still there.	Yes, resolving the ugly provision of lighting, etc. By far the best confidence-building measure is the encouragement of ordinary people to walk. This involves disincentives to private vehicle use.	Yes	X	This question did not work - it allowed just the one tick. Again, very poor questionnaire design. I would have ticked the lot and added the fact that much of the air pollution in Merton comes from domestic heating. This requires the highest standards of insulation in construction, enforcement of the most efficient heating and a return to enforcement of the Clean Air Acts to prevent the ridiculous fashion for wood-burning stoves. None of the designs, even with the best fuel, is sufficiently efficient, nor has low enough emissions: a yellow flame indicates unburnt carbon, which is particularly of the worst kind, including much cardiovascular material.	Yes	Yes	However, the powers available to Merton to mitigate the effects of air pollution are minimal, so this should not be used to allow otherwise undesirable development to acquire a green veneer.	Try enforcement. Very little is done. It's not just for air pollution. All construction sites get away with disposal down surface water drains.	Yes	Every high street has far too many.	SW19 7
6549132039	X	Very important	Are there any other challenges or opportunities for creating a healthy place in your community that we haven't considered?	More policing, CCTV in hotspots	Yes	X		No	No		Yes	Healthy hot foods should be allowed. Purrige, soups with lentils/pulses etc	SW19 8
