Subject: Masterplan

Hello

I support the aim of becoming a metropolitan centre and have no concerns over the proposed height of buildings.

HOWEVER - more consideration must be given to traffic, parking, enhanced bus services & air quality.

* Please consider a one-way system across Wimbledon bridge to relieve congestion at the Starbucks/Argos junction.

* Please introduce electric buses and shuttles (non stopping services) from Colliers Wood and Plough Lane for both shoppers and workers. Maybe a park & ride could work?

Finally, it is essential that all historic facades are maintained and that new buildings are aesthetically complimentary.

Many Thanks

R [REDACTED] McVey
