Subject: Local Plan - Colliers Wood

Please see my comments as follows:

I believe it is important to maintain, and improve heritage sights.

It is important that while encouraging redevelopment, public spaces i.e. our much valued parks and Wandle riverside areas are not eroded. These are a vital part of Colliers Wood and it's environment.

I am not sure what is intended by para d. - such as 'encourage resilience'?

Where can new streets be created without the erosion of public spaces?

It is a priority to improve traffic flow and congestion along the High Street.

I trust any plans will be publicised in detail to all residents in a very public manner rather than being left for them to discover from friends and acquaintances.
