

# The Local List

At the present time (February 2003) there are a total of 1,260 buildings included on the Local List. This figure has grown rapidly over the last 10 years, as different parts of the Borough were surveyed. However this period of rapid growth is now over as the area by area survey work is now complete. There may however be occasional additions or deletions of buildings from the List.

The majority of Local List buildings lie within one of the 28 Conservation Areas in the Borough. The numbers of Local List buildings within each of the Conservation Areas is shown in the table, as is the number of Local List buildings which lie outside a Conservation Area. When recording numbers of buildings, each identified property, (for example including each house in a terrace, but excluding individual flats within a single building) has been recorded.

A copy of the full Local List can be obtained from the address below. This sets out the addresses of buildings, and also indicates the date when the building was added to the Local List.

It is open to any person to propose the addition or the deletion of any building to or from the Local List. Buildings may be removed either because they have been added to the Statutory List of Buildings, or because they have been demolished, or because they have been altered in such a way as to diminish the architectural or historical interest. It would be particularly interesting to consider adding examples of innovative modern architecture to the Local List.

Any suggestions for additions or deletions should be sent to:
