

Group 1 = Cyclist

I really like cycling and am so pleased that there is now a safe cycle path through Morden Park. It means that I can get between work and my house quickly, so now I don't drive my car. I like to cycle really fast.

My friends and I like to go cycling at the weekend and this track is one of our favourite places to cycle. It is away from the traffic and goes through the beautiful park. Cycling keeps us fit and healthy.

Group 2 = Pedestrians

We love walking in the park. The new path makes it much easier to get through the park. In the winter our shoes won't get muddy and wet so we can walk to school everyday instead of getting the bus. It is much better to walk to school because it keeps us healthy and it doesn't hurt the environment.

Group 3 = Sustrans

We are a cycling charity and we worked on the cycle path through Morden Park.

We are really pleased with the path as it means people can cycle safely to and from work, school, the shops and home. This means that children and adults will be doing more exercise and so should be healthier. It is also brilliant for the environment because lots more people can cycle and walk instead of driving a car or taking the bus.

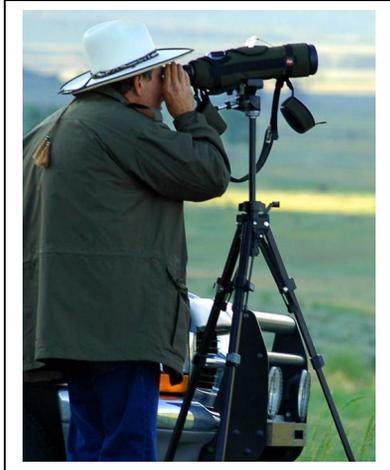

Group 4 = Trees for Cities

We are an environmental charity that plants trees and plants all around London. We have been doing lots of work in Morden Park.

We are really happy that the cycle path has given people a safe and easy route through the park.

Unfortunately some trees and plants had to be cut down to make space for the path. This means some animals, birds and insects may have lost their homes.

Group 5 = Wildlife Lover

I really enjoy sitting quietly in the park and watching the wildlife.

I do not like the cycle track. It means that more people are using the park, which disturbs the wildlife. Some plants and trees have been cut down to make the path and these were homes to wildlife, which is very upsetting.
