

From: Gregory. J

Sirs,

I am rather concerned that more and more housing is being built without accompanying amenities like better drainage, schools, health provision and open spaces, not to mention car parking facilities. I have lived in Raynes Park all 66 years of my life and have seen schools being replaced by housing, open spaces replaced by housing and no major drainage improvements so we still have flooding under Raynes Park Bridge when it rains heavily. I do feel that there should be a limit to the number of residents in our area before Raynes Park becomes covered in concrete and we have permanent gridlock on the roads.
