

From: McGowan. I

Dear sir/madam,

I am writing in response to the request for views regarding the draft sites and policies development plan, specifically with respect to 26 Bushey Road.

I wanted to express my opposition regarding proposed plans to turn this into a residential development, specifically as it has the potential to impact on my own property - I live at xx Kingston Road. I am concerned that the amount of direct sunlight to my garden will be limited as the result of any erection of residential buildings - regardless of the number of stories that may be involved.

I am also concerned that any development will not be in keeping with the local buildings - most of which are old terraced housing (Victorian in my case).

I hope my opposition will be noted and accounted for when final decisions are made regarding site development. I would only be prepared to accept single story developments, or two story if there is no significant impact on the amount of direct sunlight my garden receives - which would require the buildings to be a significant distance from my property.

Yours truthfully,
