Dear Sir/Madam

I'd like to have included in the modification document a greater emphasis on the provision of public toilets. Merton has steadily closed all of its public toilets, placing increased reliance on the private sector to meet demand. This has led to some good provision in well to do areas such as Wimbledon, and precious little provision in Mitcham or Morden. The lack of public toilets affects both young and old, people with children and people with disabilities. It really is time for Merton to step up and begin addressing this issue across the borough.

Thanks
