Good afternoon

I want to add my objection to the proposal of new flats being built on the gaswork site.

While I agree Merton needs more affordable housing there is no way Mitcham can accommodate this amount of houses in such a small site. The roads are already grid locked. Schools are over subscribed. Local doctors surgeries are too busy. There isn't even enough good local shops or amenities.

Also there is no new evidence that I'm aware of saying it is safe to build on a the site.

Regards
