Subject: Objection to MM62 (Mitcham gaswork site)
Date: 17 March 2024 21:06:04

Dear all,

My name is _____ and I'm resident in Mitcham, quite close to the gaswork site. I am writing _____ you to ask you to reject once for all the current planning proposal MM62, citing the following reasons:

- The previous plan was about 9 dwellings and now they have also increased to 10 without any reasonable and thoughtful grounds.
- The previous plan proposed was indeed with lower storey height and less dense dwelling and it was rejected by the local community, criticized by several institutions and associations, and also shown as potential -if not eventual- cause of numerous problems.
- The surrounding infrastructure (roads, public services, public transport, health services) is already extremely underdeveloped if not collapsing - and the plan here is to add such a huge number of residents without any deep and thorough modification before?
- Numerous evidences have been presented to show the risks and the danger of operating in such area without proper procedures and works.

All of this seems to be the n-th building/financial speculation just to help friends of friends. And to be clear, i'm not at all against new buildings - i just ask for a real and honest evaluation about what is going to be built, and against so much evidence, so many facts and above all against true common sense.

Regards,
