**Proposed Development**

**T4 Pear - Mature tree in poor structural condition with crown die-back and a fruiting body of Ganoderma sp. on the main trunk at base level. Tree was worked on in 2020 removing some of the end weight and the arborist noted the condition of the tree was not great, felt very wobbly for a tree of this size and trunk diameter. Given the appearance of the tree, the owner would like to remove it as well as the raised bed around it and re-landscape the area, planting a more suitable tree as well. Suggested works are to fell and grind out the stump**
