Proposed Development

Removal of 1 x Acer Negundo. This tree has been subject to heavy reduction in the past, raising the canopy to over 6m. The subsequent growth is sparse due to the competition for light with the adjoining substantial oak. Competing for light has caused the tree to grow at an angle of 45 degrees from the boundary of 25 Barham Road. The growing angle combined with a long tear wound to one of the 3 trunks raises concerns for the long-term structural integrity of the tree, which is close to the main house and directly above 2 garden buildings.

Location	Agent	Atten:		
25 Barham Road
