

---

To whom it may concern,

I would like to oppose the "infill" proposal to build up to 900 houses a year in gardens and spare spaces.

I know we need housing, but to take away gardens and green spaces isn't the solution. We currently have a site on the corner of Sandbourne Avenue and Kenley Road that comes from a garden being sold off for a block of apartment that didn't get the planning. It is an eyesore and had it been made into extra housing it would have taken up parking spaces that are already short of on the road, plus would not have been in keeping with the aesthetic of the road. There needs to be proper consideration when it comes to changing a green area like Merton Park.

Kind regards,
