
I feel the document isn't user friendly and isn't clear on its proposals. I've lived in _____ for 40 years and have enjoyed the full character of this much loved area Merton Park, and believe that there isn't any of the character of this area represented in the document. I believe that building high density, high occupation, housing proposed for Kendor Gardens area in particular will remove a much loved and much used recreational facility, particularly by both young and older residences, from the character of the area.

I understand that representations regarding this document's proposals are needed by 23 March 2021.
