Controlled Parking Zone (CPZ) Proposed Zone A1 - Apostles (Dupont/Kingston)

Councillor Andrew Judge

Cabinet Member for
Environmental Sustainability
and Regeneration

T: 020 8545 3425
E: andrew.judge@merton.gov.uk

ISSUE DATE : 21 JUNE 2013

Dear Resident / Business

The safety of our residents and visitors to the borough is of high priority for us. The quality of the street scene is of equal importance. As part of this commitment, a Controlled Parking Zone (CPZ) is proposed in the uncontrolled roads in the Apostles area. CPZ's are only considered where local residents have petitioned the Council to introduce parking controls in their road. CPZ's will usually only be implemented where a majority of households who respond within a proposed area, want one in defined circumstances

The purpose of this leaflet is to seek your views on a proposal to introduce a CPZ in Dupont Road, Sydney Road, Chestnut Road, Bronson Road, Abbott Avenue, Lower Downs Road and part of Kingston Road. This proposal is in response to representations received, a public meeting and two petitions received from local residents who are experiencing parking difficulties in their road(s). Generally, residents feel the problem is being caused by:

- Commuters who park and complete their journey by public transport.
- Residents within the neighbouring CPZ's avoiding parking charges.
- Staff of nearby businesses.

It has, therefore, been decided that the Council would carry out an informal consultation to seek your views on proposals to control parking in your road (see enclosed plans for the proposals).

This area is currently being proposed as a new stand alone zone thereby allowing the residents to choose the hours of operation. However, based on the results of the consultation, it may be necessary for those supporting roads to become part of an extension to existing neighbouring zone. If roads are added as extensions to existing zones they will be adopting the hours of operation of the existing zone it is added to.

For Kingston Rd (the section between its junctions with Lower Downs Road and Bushey Road) subject to support for controls, the Council intends to split Kingston Road (east side and west side) into its two existing adjacent zones; this will allow the parking pressure from Kingston Road to be shared between Bronson Road and Oxford Avenue.

WHAT IS A CONTROLLED PARKING ZONE OR CPZ?

A Controlled Parking Zone is an area where parking controls are introduced to protect the parking needs of residents and their visitors, as well as those of local businesses. Parking bays are marked on the carriageway to indicate to motorists where they can park. Yellow line restrictions are also introduced to improve safety and traffic flow by removing dangerous or obstructive parking. In a CPZ the operational times for the single yellow lines are indicated on zone entry signs. In some cases there may be single yellow lines that may operate at different times and these will be signed separately. Double yellow line restrictions do not require signs. In the absence of loading restrictions on yellow lines, loading or unloading of goods is permitted for a limited period of time. All parking places within a CPZ are individually signed to ensure that motorists are aware of the operational times and conditions. This ensures that the bays are fully enforceable. To minimise street furniture, every effort is made to ensure signs are placed on existing street furniture, such as lamp columns or signs are combined with other street signs. In a CPZ, residents, local businesses and their visitors are given priority to use the appropriate parking places by displaying a valid permit in respect of that zone. However, a parking permit does not give the holder the right to park outside a particular premise, and does not guarantee an available parking space.

Please see the frequently asked questions (FAQ's) sheet enclosed.

HOW WILL IT WORK?

All road space in a CPZ is managed by the introduction of parking controls. Parking is only permitted where safety, access and sight lines are not compromised. It is, therefore, normal practice to introduce double yellow lines at key locations such as at junctions, bends, turning heads and at specific locations along lengths of roads where parking would impede the passing of vehicles. It is also necessary to provide yellow lines (effective during the CPZ hours of operation or at any time) where the kerb is lowered, i.e. at crossovers for driveways.

The key objective of managing parking is to reduce and control non-essential parking and assist the residents, short-term visitors and the local businesses. Within any CPZ, only those within the zone are entitled to permits. This means that long-term parkers will not be able to park within the permit bays during the operational times. An incremental pricing structure for 2nd and subsequent permits also assists in minimising the number of permits issued to individual residents and help discourage multiple car ownerships. CPZs comprise of various types of parking bays such as permit holder bays (for use by resident or business permit holders and those with visitor permits); shared use bays (for permit holders and pay and display) and pay and display only bays (permits are not valid). Council appointed Civil Enforcement Officers will enforce the controls by issuing fines/Penalty Charge Notices (PCNs) to vehicles parked in contravention of the restrictions. Outside the controlled times the restrictions are not enforced.

However, Civil Enforcement Officers will issue PCNs for any other parking contravention such as parking on double yellow lines, footways and parking across individual crossovers without the property owner's consent. The Council aims to reach a balance between the needs of the residents, businesses and the safety of all road users. In the event that the majority of those consulted do not support a CPZ in their road or area, and the Cabinet Member agrees, officers may recommend that only the proposed double yellow lines identified at key locations are introduced to improve safety and maintain access.

PROPOSAL

The proposals include a number of provisions which are detailed below

- **Operational Hours** - The choice of operational hours are explained below:

All Day Controls (8.30am - 6.30pm) - This will provide maximum protection to the residents by removing short and long-term parking. It will, however, be less flexible for residents and their visitors who will need to obtain a visitor's permit from the resident they are visiting in order to park in the permit holder bays.

Part Time Controls (10am - 4pm) - These operating times offer less restrictions on residents and their visitors than 'all day' controls. It is still effective in preventing long-term parkers. However, it may encourage short-term parking by non residents or businesses, such as shoppers outside the operating times. Residents returning from work later in the afternoon may find less available parking in their street due to this.

One-hour control (11am - 12 noon) - This minimum restriction offers more flexibility to residents and their visitors than the part time day controls, reducing the amount of visitors' permits they would normally obtain, and is still effective in restricting long-term parking. However, it may encourage other short term parking outside the restricted time, by non-residents such as shoppers and other residents from neighbouring CPZs. Non-residents may also work their way around the one-hour by moving their vehicles and then returning to park for the rest of the day.

The proposed operational days include:

Monday to Friday - This will offer more flexibility to residents and visitors at weekends. However it may encourage non residents, especially shoppers, to park on Saturdays, therefore reducing available parking for your visitors.

Monday to Saturday - Provides maximum protection to the residents. However, it will be more restrictive on visitors

who would require a visitor's permit to park during the controlled times.

The standard prices for annual parking permits apply to all operational times, whether all day, part time, or 1 hour controls.

Parking Provisions - The following are incorporated within the proposed measures :

- Double yellow lines at junctions, bends, ends of cul-de-sac and at strategic sections of the road to create passing gaps. (This will improve safety and access at all times by reducing obstructive parking that is currently taking place)
- Shared Use Pay and Display bays are also proposed where it is necessary to allow non residents to pay for parking for a short period at specific locations such as near shops, schools, churches and also in areas for longer term parking where residents are not directly affected, to allow effective use of the bays. (This will increase the use of parking provisions in the area by pay and display customers whilst still maintaining parking facilities for permit holders)

LET US KNOW YOUR VIEWS

The decision on whether or not to proceed with the next step, which would involve a statutory consultation on the proposals, will be subject to the responses received during this consultation. We would ask if you could submit your questionnaire online using the link provided www.merton.gov.uk/cpza1_apostles. The online system has been created to keep costs down and allow the Council to process your views more efficiently. Alternatively you can complete and return the enclosed prepaid questionnaire (no stamp required), with any comments or suggestions you may have by **12 JULY 2013**.

We regret that due to the number of responses received during an informal consultation of this size, it will not be possible to individually reply to each respondent. We welcome your comments on this proposal, which will be noted and included within the proposed measures where appropriate. You are also invited to speak to officers at the public exhibition on **29 JUNE 2013** as detailed overleaf. It should be noted that subject to the responses received, a recommendation may be made to only include those roads where there is a majority in support of the proposals.

WHAT HAPPENS NEXT

It is envisaged that the results of the consultation along with officers' recommendations will be presented in a report to the Street Management Advisory Committee and/or the Cabinet Member for Environmental Sustainability and Regeneration. Once a decision is made you will be informed accordingly.

You can visit our website using the following link www.merton.gov.uk/cpza1_apostles. You may also view the plans in Merton Link at Merton Civic Centre, Morden during our working hours, Monday to Friday between 9am and 5pm or Raynes Park Library.
