SURVEY DATE	STREET NAME	Parking Type	Duration																
			00:00	01:00	02:00	03:00	04:00	05:00	06:00	07:00	08:00	09:00	10:00	11:00	12:00	13:00	14:00	15:00	16:00
		visitors'/shoppers'	10	10	2	1													
	WOODLAND WAY Total		16	33	6	18	22	4	4	3	2	2		2	1	1	3		23

- The number of Residents'/businesses' vehicles (Vehicles present at 0500hrs and return back to the area within survey hours)
- The number of visitors'/shoppers' vehicles parked. (Vehicles only present between 0600hrs and 2200hrs, for no longer than 5 hours)
- The number of commuters' / employees' vehicles parked.(Vehicles only present between 0600hrs and 2200hrs, for longer than 5 hours)

DK A drop kerb space is one where the kerb drops from the pavement level to the street level to enable vehicles to cross the pavement for access to off-street parking. If the kerb drops, it will be shown as a drop kerb space, regardless of the parking restriction type next to it.

SYU An undesirable single yellow line bay is one where a vehicle would cause an obstruction if it parked in it.

PROXIMITY TO JUNCTIONS:

The last bay of a minor road before it meets another minor road or major road are undesirable (5m).

Similarly the last two bays of a major road (10m) before it meets either a minor or major road are undesirable.

ROAD WIDTHS:

If a road is less than 5.0m wide, both sides of road will be undesirable (as you could park on one side but traffic would not be able to pass).

If the road is between 5.0m and 8.0m wide one side will be desirable and the other undesirable. If above 8m both sides could be desirable.

All lengths of road with a DK or ACCESS are undesirable.

PROXIMITY TO PEDESTRIAN REFUGES: at least one bay either side of a pedestrian refuge is undesirable if there are no other restriction types eg. ZIG ZAG
