

Wimbledon Park Lake Safety Project

Summary of Technical Steering Group Meeting – 03 November 2020

Procurement:

Ward and Burke undertaking their Pre Construction Services period of work. Contract is being finalised and engrossed for signature by the D&B contractor.

Surveys, Flood Study and Flood Risk Priorities:

Commencement of annual inspection is imminent using ARPE Andy Hughes and will be complete before year end. Should highlight any defects or ongoing maintenance issues.

The Wimbledon Club have been taking regular water level readings of the lake which are showing that the water level is continuously above the statutory level. TS noted that the water level will naturally fluctuate with rainfall and no action to lower the statutory water level is planned at this time.

Project Timeline:

Contract to be signed and issued before this becomes available. The completion date remains within the dates set within the statutory requirements.

Water Quality and Pollution:

EA been in in contact regarding a recent pollution event. Significant number of fish kills within the southern arm inlet. Thames Water and EA have been onsite for clean-up and investigation upstream.

The Fishing Club has requested that a net is placed between pontoons to form a holding zone. Health and Safety measures requested from them.

Water quality seems to be in good order despite pollution event.

Risk & Opportunities Registers:

These were reviewed and updated.

Date of Next Meeting:

- 1st December 2020
